Begin Makigani
What if

5 May 1943 meeting

Not to

What if bomb was a dud? There's right
receptor it, exploit knowledge of
internal target pop. plant at Truk - so dud
would sink.

First example of one dut - and one power
against another (possible)

In Dec. '44 they didn't know who was would
end (not till Jan '45)
yet no consideration of bombing Kure...

Histories missed the decision because of ignored
determiner.

Bombing of Hiro. was not a military decision -
not made in context of affecting the war

Rather, in context of nuclear established
preserving itself, protecting its position role - found that
Never a meeting of top leaders: Should we
use the bomb or not?

Scientists were had any political clout, as
they thought - they only seemed to work they agreed with
pols.

July 30, 1945 when MacA was informed about
it

No operational commander involved in decision.
Kearley found out only by accident - he happened to be in
meeting.

Congress would fund the after war if
weapon was not used - \$25

That's why B-29 was used as soon as
available, and 2d B-29 as soon as weather permitted.
(Yet, postwar and hunting)

New Estate wanted to stay in business - 'This is
the weapon with which we will dominate the
world.'

Consent, Bush, FOR, Stinson, (

April '45

"If we can figure out
the proper use of this
weapon, (no way for
Russia.)"

Assuming no monopoly.

idea of

"Multiple

SU + US can't keep people in line any more -
Breakup of SU has created new new states - it will
become much easier to acquire new materials... (+ experts)...

Chernov will say: "You want us to be one-free?
Give us so much for the Pen - we'll give
them to whom you say (not Russia) - for so much
is foreign exchange

Indians can already emigrate with

Mollizani:

movements for

environmental saving

social justice

anti-militarism

struggles all international

no national, "revolutionary" solutions:
(US hostility to revolution)

no adequate new ideology)

But there are lots of rich people ("Rockefeller
Assocs. send me money") who ~~are~~ are ready to
reconsider basics

Milton Hoenig - Doctorate in Nuclear Physics, worked in
ACOA and Center, helped with Nuclear Handbook at
NRDC...

Argus Electrical Engineering Doctorate in Nuclear Fusion
in Berkeley

First Energy Conservation paper (1971) potential in US
(5 years before Kervin). in "Environment" May. 1972
in Berkeley. Nelder saw it.

"Energy and Agriculture in the Third World"
for Ford Foundation.

Marxist economics didn't add up, as marx
to question, "Why is India poor?"

"Peasants even more exploited than workers"
